

Admin UX API & Wrapper API Service

High Level Architecture

Option1: Wrapper API will connect to Platform APIs, which are existing in system and will work for all the use cases of the Agentic Solution.

In this case, We need to list all APIs which will help in resolving the different usecases

Option2: Write all Wrapper APIs needed to reduce no. of rounds Agentic Solution will take to get result, copy the existing APIs from Platform and rewrite here (reducing the unnecessary sections and write performant code)
